

TECHNO TOY TUNING

240/260/280Z MICRO BIG BRAKE KIT

PACKING LIST:

- 2 Wilwood calipers
- 2 Rotor hats
- 2 Caliper brackets
- 2 Brake rotors
- 2 Stainless brake lines
- 1 Box Wilwood brake pads
- 1 Hardware kit

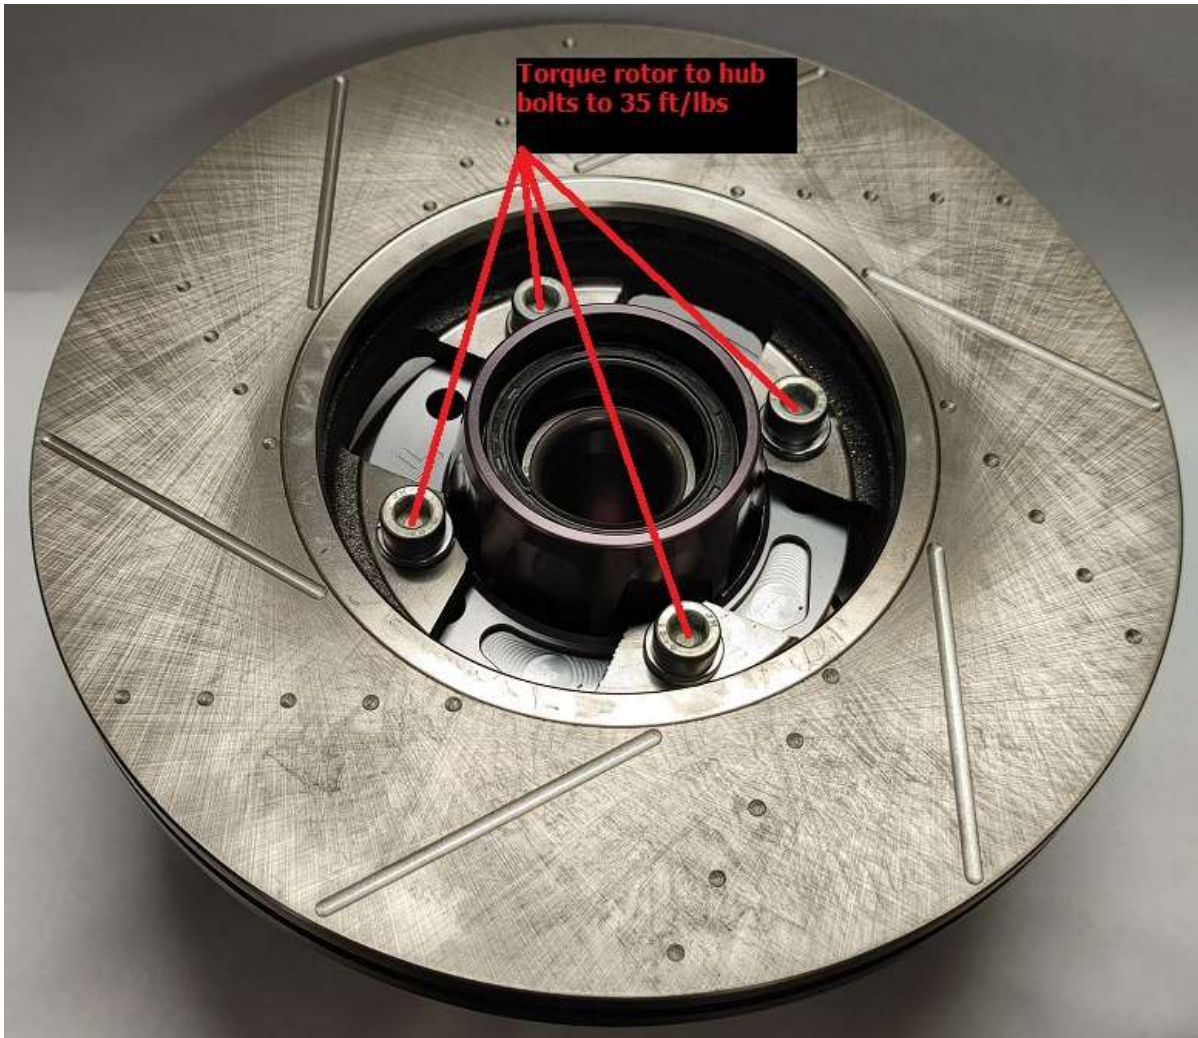

HARDWARE KIT CONTENTS:

- 2 x 90-degree elbows for stainless lines
- 4 x 3/8 x 24 x 2" Socket Cap (Caliper to Bracket)
- 4 x 12 x 1.25 x 30 Socket Cap + Lock washers (Bracket to hub/Spindle)
- 8 x 10 x 1.25 x 45 Socket Cap + Lock washers (Rotor & Hat to Hub)

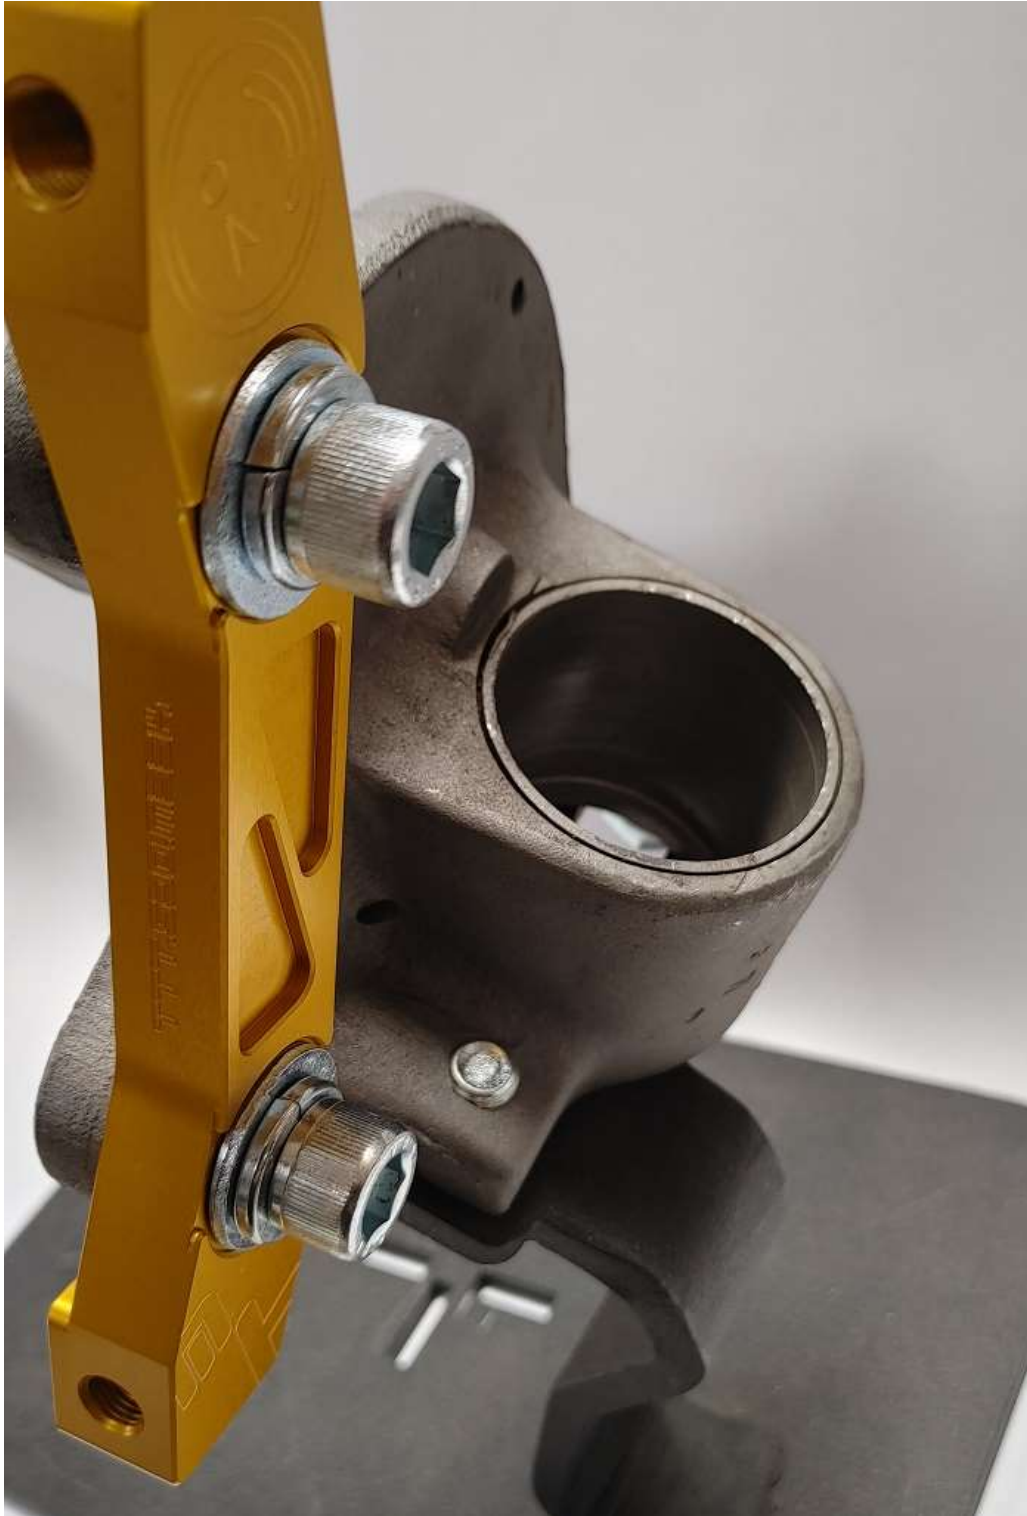

Once you have completely removed your factory brakes and have your bare hubs and spindle you will be ready to proceed.

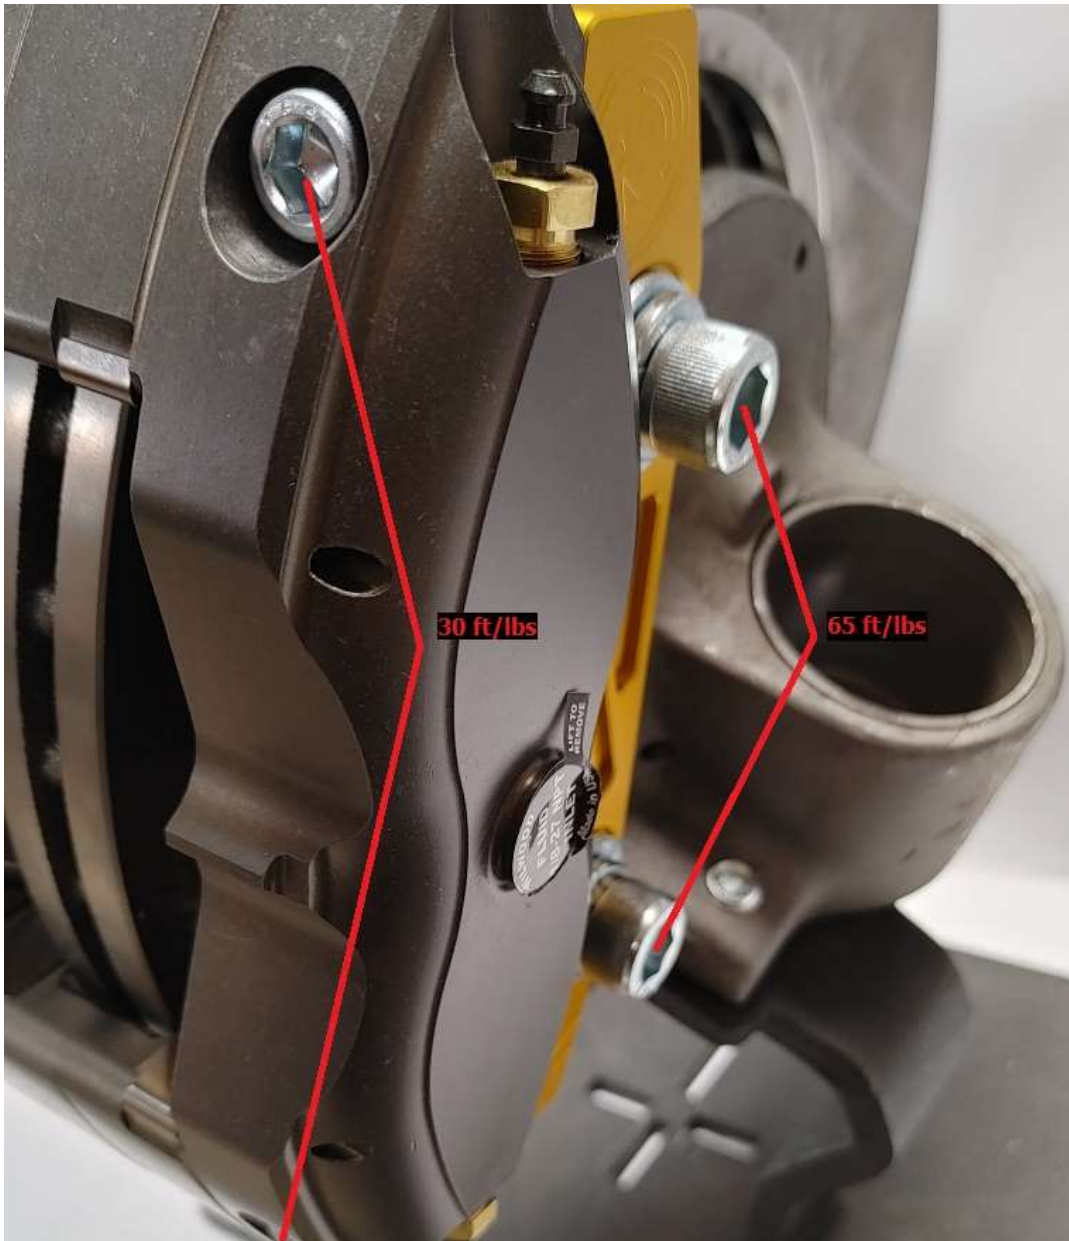

Place your hub front side down and place the rotor hat/spacer onto the hub with the small ridge on the inside facing up as shown.

Place rotor as shown, align holes and tighten the 10-1.25x45 bolts uniformly until a final torque of 35 ft/lbs is achieved. Install your freshly packed inner wheel bearing, and install the grease seal (if replacing/repacking bearings).

Install the bracket like shown using the 12-1.25x30 bolts and torque to 65 ft/lbs.

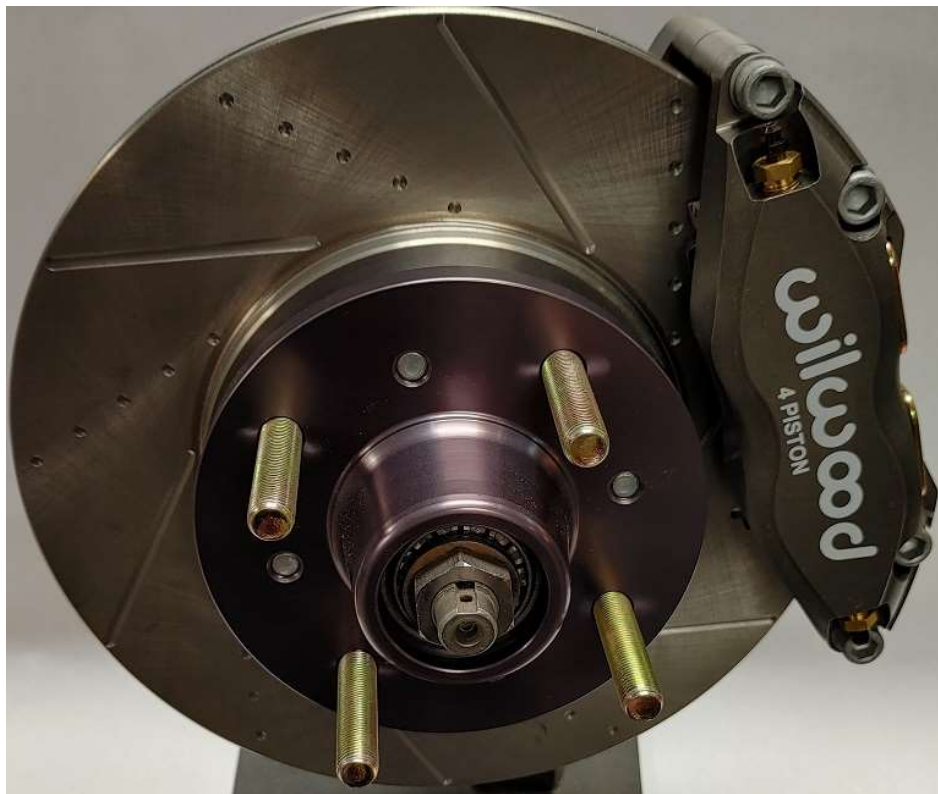

Install rotor onto spindle, install packed front wheel bearing with spindle washer, nut, and torque according to manufacturers specification or your favorite method. Be sure to install cotter pin as well. Install caliper onto bracket using the 3/8-24x2" bolts and torque to 30 ft/lbs.

Remove retainer clip and slide pads into place. Install clip as shown.

Repeat this procedure for the opposite side of the car, Install the brake lines to the calipers and then to your vehicle side hard lines. Orient lines to ensure they will not be rubbed on or kink in any way, once they are installed, bleed the brake system to ensure no air is in the system. Please double check all hardware is properly tightened to specification, and be sure to install hub dust cap so it is fully seated.
